**Which of these is the most useful observation to record?**

**A** “It changed.”

**B** “It looked interesting.”

**C** “Blue litmus turned bright red within 5 seconds.”

**D** “It was probably an acid.”

**A few drops of a liquid turn blue litmus paper red. What does this tell you?**

**A** The liquid is a base

**B** The liquid is an acid

**C** The liquid is neutral

**D** The litmus paper is faulty

**In which kind of solution does phenolphthalein turn pink?**

**A** An acid

**B** A base

**C** A neutral solution

**D** Any solution containing water

**A liquid turns methyl orange yellow. Can you be sure it is a base?**

- A** Yes, yellow always means a base
- B** No, a neutral solution also turns methyl orange yellow, so test with another indicator
- C** Yes, but only if the liquid is clear
- D** No, yellow means the liquid is an acid

**Which liquid from today would you expect to turn methyl orange red?**

**A** Liquid soap solution

**B** Tap water

**C** Baking soda solution

**D** Vinegar
